- Biometric Technologies
- CCTV Systems
- Intrusion Detection Systems
- Intercoms
- Intelligent Video
- Microwave & Seismic Detection
- Security System Testing & Verification
- Technical Drafting/CADD Services
- Crime Prevention Through Environmental Design (CPTED)

ARA is an internationally recognized industry leader in all areas of physical security. Coupled with our leadership and science in force protection security engineering, we conduct high quality facilities vulnerability studies and develop the right design solutions to deter, mitigate, protect and operate our nation's protected missions, information and people.

Physical Security is defined as the environmental, mechanical, detection and monitoring elements that impact the protection of an entity, organization or mission. ARA works from both the outside in and from the inside out to configure whole site and facility options and solutions.

ARA addresses perimeter protection measures, exterior and interior bollards and operable mechanisms, surveillance and monitoring equipment, access control systems, locking devices, lighting and required manpower operations, all integrated and incorporated into a building or campus design to meet our customers' operating objectives.

Our Qualifications incorporate the expertise of physical and electronic security professionals who are recognized ASIS International members, certificate holders, and instructors. ARA actively participates in the advancement of the security profession and the Certified Protection Professional (CPP) and Physical Security Specialist (PSP) designation programs. And because we are experts and practitioners in the latest industry standards, we respond to our clients' program and budget requirements in a responsible and timely manner.

ARA Security Policy, Programs and Training Services round out our technical service offerings. We can deliver Covert and Hi-fidelity Security Programs, Physical Security Training as well as Counter Surveillance Training. ARA has played a major role in the development of Interagency Security Committee (ISC) Design Criteria, the Unified Facilities Criteria (UFC) and understand how to help make effective decisions. We also understand and employ all Department of Homeland Security Directives and programs.

Many of our professionals have ex-military backgrounds, have deep technical installation and service field experience, and hold active security clearances with current ARA clients.

Over the years, ARA has been entrusted with significant work from repeat customers. They rely on ARA's passion for impeccable customer service and high quality technical expertise to get the job done right every time. This is who we are and what we do at ARA.
