

DCMS Release Notes:

July to September 2018 Updates

Version 5.2

- Added ability to save plots as CSV format in addition to DPLOT.
- Improved output summary for models with multiple end reactions.
- Added ability to batch select models for inclusion in report appendix generator.
- Added additional control to selectively include Charge Weight information in output text.
- Cleaned up group and category interaction with report appendix generator.
- Improved license management to allow for requesting, importing, and replacing software license through the Help Menu.

NOTE: Installing the latest software version will work with the current active license file.
