

# ARA

Want to solve problems  
of global importance?

ARA is globally recognized for applying technically-excellent, in-depth and diversified research, engineering, and technical support services to provide answers to complex and challenging problems in the physical sciences.

All ARA employees that I have worked with exhibit a true passion for assisting their clients to be successful in whatever project they are working. For me, the passion for helping to protect people from a wide range of threats is one of the reasons I come to work each day. — Nancy, ARA Division Manager

What I like is... the freedom to follow your passion, but more importantly, the opportunity to work with others who are technically the brightest in the country, as well as being totally devoted and passionate to doing the right thing, and doing it well. I enjoy being able to say, 'I work for ARA, and we solve the hard problems.' — Craig, ARA Senior Engineer

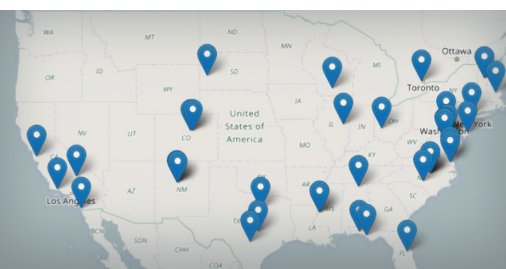

**MEANINGFUL WORK • EXCELLENT BENEFITS • LEARNING OPPORTUNITIES**

## WHO WE ARE

Applied Research Associates, Inc. (ARA) is the company that government and industry turn to for innovative technologies and solutions to problems that improve our safety, security, and way of life.

Our employee-owners, most of whom hold advanced degrees in engineering and the physical sciences, have the expertise to tackle the most challenging technical problems.

Founded in Albuquerque, NM in 1979, and now 100% employee-owned, ARA has grown steadily with offices throughout the United States and Canada

## National Security

ARA delivers innovative solutions to assess, detect, deter, defeat, and respond to threats facing us at home and abroad.

## Infrastructure

ARA leads in technologies and services to improve performance and sustainability of infrastructure for transportation, buildings, and energy systems.

## Energy & Environment

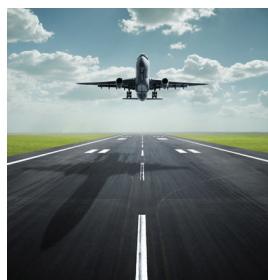

ARA provides innovative engineering services and products for alternative fuels, and the power and utility services market.

## Health Solutions

ARA provides specialized research and technology services, testing and product development in health science and engineering.

**Equal Opportunity Employer:** The continued success of ARA depends heavily on the engagement of talented individuals and diverse teams. At ARA, we offer a work environment where all employees have the opportunity to do work they are passionate about and policies and practices ensure equal opportunity for everyone. Differences in thoughts, styles, backgrounds, and opinions are valued.
