

N-DRIVE AUTONOMY

ZERO HUMAN INTERVENTION. ANY VEHICLE.

SEAMLESS, SCALABLE, AND SECURE AUTONOMY ACROSS ALL TERRAINS

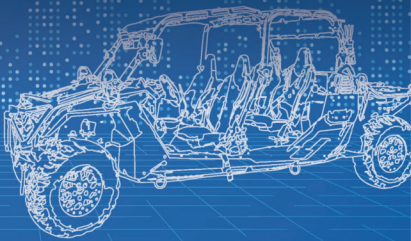

N-DRIVE

FULL SYSTEMS
CAPABILITY WITH

MPMS:
MISSION PLANNING
AND MANAGEMENT
SYSTEM

ATAK:
ANDROID TACTICAL
ASSAULT KIT

READY FOR ANY ENVIRONMENT

- Tested in nearly every terrain on earth using advanced simulation tools, including our Virtual Integration and Simulation Environment (VISE)
- Leverages ARA's state-of-the-art perception capabilities
 - proven to work in dust-filled mining environments

SEAMLESS PERFORMANCE

- With N-Drive, you can increase operational efficiency; enhance safety for operators and personnel; and simplify deployment through integration with existing systems
- Provides seamless control of a wide variety of vehicles and platforms via Modular Open Systems Approach (MOSA) compatibility
- Empowers the synchronized movement of multiple autonomous vehicles for efficient convoy operations
- Designed to eliminate need for human intervention, setting a new standard in autonomy performance

SCALABLE AND SECURE

- Maintains highest standards of UGV cybersecurity, ensuring safe and reliable operation in any environment
- Adheres to open standards, ensuring long-term scalability and the ability to integrate new technology as it evolves
