

ORCHESTRATE THE FIGHT

At ARA, we do more than accomplish the mission — we redefine what's possible. United by deep technical expertise and a relentless mission focus, we create advanced solutions that strengthen national defense and safeguard our security, resilience, and way of life.

In close partnership with special operations forces, we develop next-generation capabilities that enhance readiness, accelerate decision-making, and strengthen force protection across the multidomain battlespace. By anticipating emerging threats and delivering mission-driven innovation, ARA equips warfighters with the agility, confidence, and technological advantage needed to succeed in the battlespace of tomorrow.

MISSION AUTONOMY • OPERATOR-DRIVEN INNOVATIONS
KILL CHAIN OPTIMIZATION • DECENTRALIZED EXECUTION

MAXIMIZE LETHALITY, ENSURE SURVIVABILITY

MISSION PLANNING MANAGEMENT SYSTEM (MPMS)

Coordinates diverse unmanned systems through modular behavior integration and multi-platform management

DTT: DETECT, TAG, TRACK

Modular, tactically-ready system for fully autonomous detecting, tagging and tracking of critical threat assets

TRIDENT

Tracking & ReIdentification for Exploitation of Networked Targeting

ENContRA

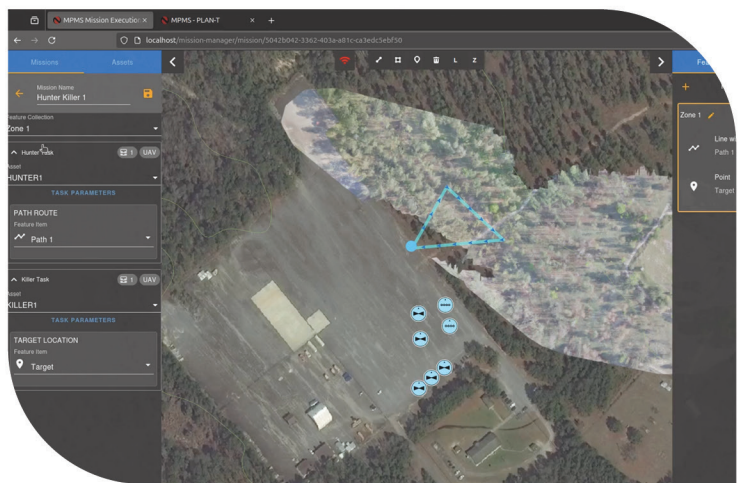

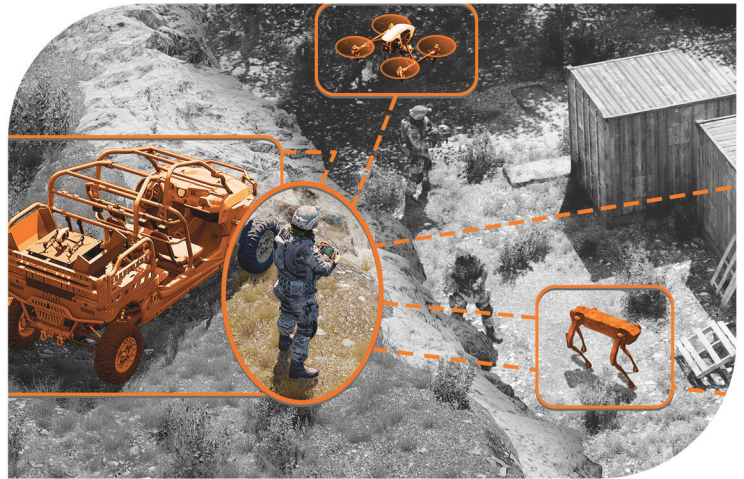

Navigate UAVs (Unmanned Aerial Vehicles) without GPS

Mothership

Autonomous deployment of attritable UAV's with kinetic and non-kinetic payloads in support of multiple mission profiles

N-DRIVE AUTONOMY

Seamless, scalable, and secure autonomy across all terrains

100% EMPLOYEE OWNED
45 YEARS US DOD SUPPORT
2,300+ EMPLOYEE OWNERS
72% ENGINEERS & SCIENTISTS
25% MILITARY EXPERIENCE
