

# WINGARD PE

## Release Notes:

*July to September 2018 Updates*

### Version 6.1

- Added ability to save plots out as CSV (Comma Separated Values) format in addition to DPLOT format.
- Added color-coding of window system icons in output tree to visually identify glass hazard/performance conditions after analysis.
- Improved glazing contact model based on improved energy conservation and comparisons with test data.
- Improved speed of glazing capacity calculations and generation of Pressure Impulse Graph generation.
- Updated software to accommodate the use of comma (,) delimiter for decimals in input based on regional operating system settings. Output text still uses period (.) for decimal delimiter in numbers.
- Improved license management process incorporated into WINGARD to allow for requesting, importing, and replacing software license through the Help Menu.
- Minor updates to improve the look of the user interface.
- Updated User Guide to reflect updates to the program since version 5.5.

*NOTE: Installing the latest software version will work with the current active license file.*
